

Mita Fasteners Pvt. Ltd

COMPANY PROFILE

An IATF 16949 COMPANY
Certified by DQS Holding GmbH

FASTENERS PVT. LTD.

FASTENING SOLUTIONS
UNDER ONE ROOF

OUR STORY

Our story commenced when the Late Mr.Chandrakant Shah decided to rise up from his meagre beginnings to forge a legacy in Indian Business History. He started with a trading company by the name of M/s Bright Tube Corporation which was a stockist of renowned companies like Mahindra Ugine Steel Company Ltd. (MUSCO), Kalyani Steel, Goradia Forge and many more. Pretty soon he found a worthy ally in a brilliant engineer of fabrication technology, his son Mr. Deepak Shah.

Having dabbled in the metal industry for long, their “desire to create” led to the formation of MITA FASTENERS PVT. LTD. in 1992.

We started small, however with our collective knowhow of 47 years in the metal industry, our razor sharp focus on research and development and our fierce obstinacy about quality standards (sometimes at the cost of losing on profits), we grew to be a name to be reckoned with in the fastening and cold forged components industry.

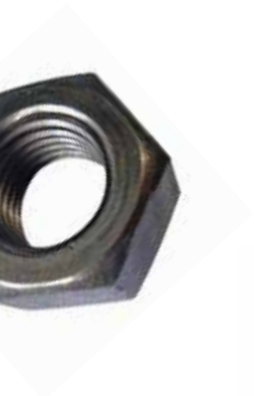

It is no wonder then that we gained an enviable roster of customers who have relied on us for decades.

OUR OFFERINGS

We at Mita Fasteners Pvt. Ltd. help our customers with high precision Fastening Solutions and Cold Forged Components. We manufacture and market High Tensile and Stainless Steel Fasteners of a range of grades, sizes and passivity as per defined standards. We specialize in customized and special fasteners that are made as per customers' specific drawings/ requirements with different types of material.

The ranges that we offer are as below:

- 1) Stainless Steel and Hi-Tensile Fasteners and Industrial Fasteners with Electroplating
- 2) Hex head screws/bolts/nuts/studs, Socket Set/ Head Cap Screws/ Bolts (Hex, C.S.K Button Head Screws) in grade A2/A4 (304/316), Inconel, Monel, Titanium, 8.8, 10.9, 12.9, of diameter M4 to M52 and in length - 10 mm to 350 mm.
- 3) Cold Forged Components as per customer requirements/ drawing upto Diameter of 20 mm and Length 300 mm.

OUR INFRASTRUCTURE

We are based at Wada, an industrial hub near Mumbai, in a 120,000 sq.ft plant, which consists of a 30,000 sq.ft. Shop floor and a 10,000 sq.ft. Plating plant.

1 The Shop Floor

We have a 30,000 sq. ft. shop floor with the finest equipments in the industry to ensure quality output. We have ensured that we have a facility where all critical processes are in-house, to ensure control over quality and speed. We have cold forging as well as hot forging facilities in-house along with relevant equipments for machining and grinding as well.

We have a range of high end Bolt Formers, Thread Rollers, Hardening Furnaces, etc. in our artillery.

We've got the most versatile, fastest and high precision fastener cold forging machines known for:

- i) Standards of excellence in speed, productivity and quality
- ii) Ability to attain excellent molecular structure of any part
- iii) Ability to manufacture in any material (ferrous and non-ferrous) with a range of plating and coating.

2 The Plating Plant

A 10,000 sq.ft. facility of Electroplating, Zinc Plating (Zinc Acid and Zinc Cobalt) that produce products that withstand salt spray tests.

3 The Laboratory

To adhere to our strict quality conscious approach, we have a world-class testing laboratory with all the necessary equipments needed to ensure that our products are of the utmost quality. We also have tied up with Geochem Lab. For Physical, Chemical Testing and Microscopic Study (NABL Approved). All testing equipments are calibrated and certified by NABL.

KEY MANUFACTURING EQUIPMENTS

Description	Capacity
Bolt Former	M6 x 50
Bolt Former	M8 x 55
Bolt Former	M10 x 100
Bolt Former	M14 x 160
Thread Rolling Machine	M6 x 100
Thread Rolling Machine	M8 x 75
Thread Rolling Machine	M12 x 150
Thread Rolling Machine	M16 x 150
Washer Assembly Machine	M8 x 50
Cont.Mesh Belt Furnace	250 Tons/month
Cont.Tempering Furnace	280 Tons/month
Zinc Plating (Barrel)	1000 kgs/Day
Screw Press Hot Forge	Max. Dia 56, Length 450 mm

OUR OBSESSION WITH QUALITY

Quality is our raison d'être. We are so fiercely obsessed with quality that there have been more than one instance where we might have upheld the standards despite profitability taking a hit. We have always put quality above everything else, which explains our enviable list of customers and why they have been steady with us since decades.

Training

Quality starts at Mita Fasteners with training of our team members with respect to practices that uphold quality. Every member of the Mita Fasteners team is aware of the "spirit of quality" that we uphold, each member goes through rigorous trainings and audits to be able to deliver what we expect of them.

Process improvement

For us producing quality products is not a one-time activity but a lifetime obsession, which is the reason why we have gone great lengths to put Six Sigma Methodology into practice. When every process is improved and continuously audited to deliver the right quality and quantity, we will become more and more capable to deliver our ideal. At present we are at 5.5 level of Six Sigma.

Testing

We employ state-of-the-art quality testing and checking equipments in our laboratory where our Quality Check department keeps a sharp eye on the material brought in, processed up until its despatch to our customers. All testing equipments are calibrated and certified by NABL. For those tests that we don't have a

facility yet we have tied up with certified laboratories for rigorous testing.

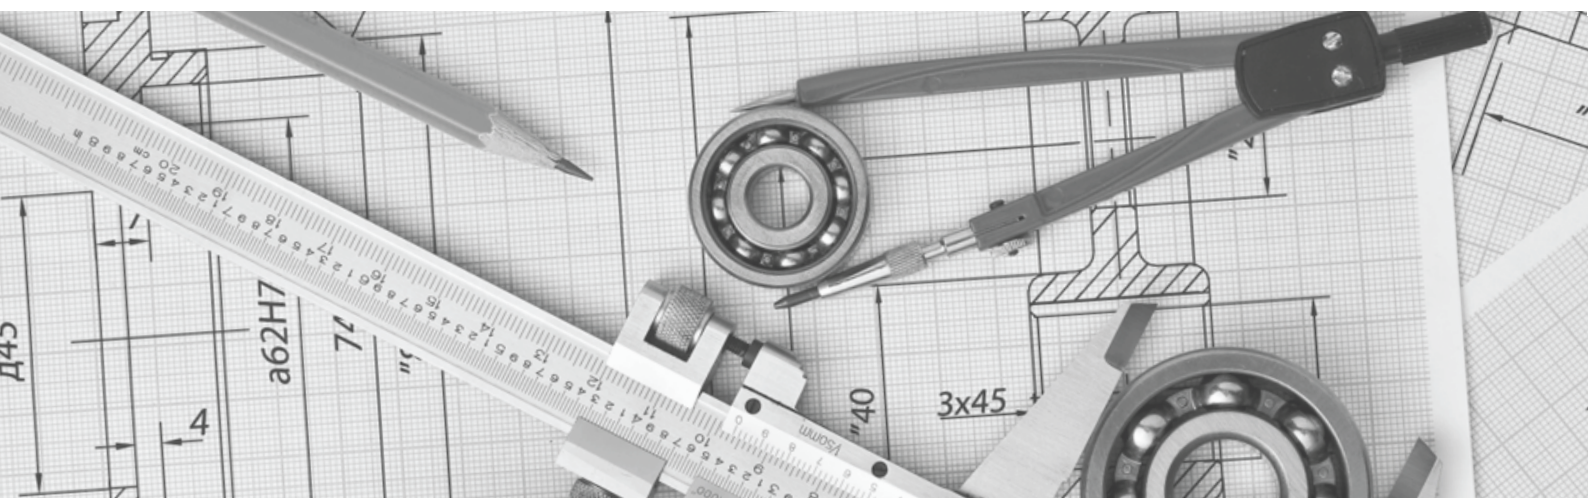

In-house Critical Processes

Contrary to industry norms, where owing to cost implications, most fastener and cold forge component manufacturers prefer to have their critical processes outsourced, we at Mita Fasteners have gone ahead to incorporate it in-house. We are quality freaks and we can't bear the thought of not having control over the quality of our products. Having all critical processes in-house allows us to have a tight control over the quality of products that we manufacture thus giving our customers unparalleled reassurance.

Certifications and Accreditations

We are an IATF16949 as well as ISO 9001:2015 certified from DQS. Whereby each of our processes are rigorously audited at regular intervals to ensure production of best quality and error free products.

Our AS:9001 certification is also in process.

WHY OUR CUSTOMERS CHOOSE US

1. All Fastening and Cold Forge solutions under one roof

Handling multiple vendors for multiple components is a headache for most manufacturers and project companies, which is why we at Mita Fasteners provide the whole basket of products when it comes to Fastening Solutions or Cold Forge components. Rest assured, our customers just need one point of contact for all their fastening and cold forge solutions.

2. Consistent Quality

As we said before, we are obsessed about quality. We go out of the way to ensure that our customers get the best quality products time after time. We have set rigorous QC mechanisms and unlike other manufacturers, invested heavily to build up all critical processes in-house, whereby we can have absolute control over quality. What's more, to ensure consistency of this quality we are practicing Six Sigma Methodologies (Current level 5.5) and we had ourselves certified for IATF16949 as well as ISO 9001:2015 from DQS, whereby our processes are regularly audited by relevant authorities.

3. Express Service

Owing to our in house capacities and our systematic and ever improving processes, we are in a position to deliver far faster than any of our contemporaries, who unfortunately lose out on time in material movement. We have a stellar track record of delivering fast and on time, which is why most critical components manufacturers and project companies vouch for us.

4. Trained and proficient team

Our team of well-trained and qualified professionals are our backbone. Owing to the certifications we have taken, our process involves rigorous internal technical training for each of our team members. What's more, we have hired specific external consultants to develop the management and soft skill levels of our team. Rest assured, when each job given to us is in safe and responsible hands.

5. Integrity and Trustworthiness

We take our business seriously and hence the commitments we make are important for us. We have always stood by our word whether it comes to quality, quantity or service and have always strived to keep the customers interest on the forefront. The fact that almost every customer of ours has been steady with us for at least 5-10 years is a standing testimony to our integrity and trustworthiness.
